Chandigarh / 24th, June.

The General Secretary of All India Congress Committee, CWC Member, Sirsa MP and Former Union Minister Kumari Selja urged the Centre to pass on the benefits of declining global crude oil prices to consumers by reviewing the prices of petrol, diesel, CNG and domestic LPG. Kumari Selja said that whenever international factors are cited as reasons for increasing fuel prices, consumers should similarly receive relief when crude oil prices fall in the global market. She noted that rising fuel costs over the years have significantly contributed to inflation, affecting

transportation, agriculture and the prices of essential commodities.

Kumari Selja said the common citizen has been facing the burden of inflation for a prolonged period. Any reduction in fuel prices can provide much-needed relief to households, farmers, small businesses and the middle class. Kumari Selja pointed out that higher prices of petrol, diesel and cooking gas directly impact daily living expenses and increase the cost of goods and services across sectors. She stressed that lower global crude prices offer an opportunity for the government to review fuel pricing policies in the interest of consumers. Kumari Selja also referred to the financial performance of public sector oil marketing companies, stating that many of them have reported strong earnings and profits in recent years. In such a situation, she said, the government should consider measures that benefit ordinary citizens rather than focusing solely on revenue collection.

According to Kumari Selja, reducing fuel prices could have a wider positive impact on the economy by lowering transportation and

production costs, which may help contain inflationary pressures. She called for a transparent review of petroleum product pricing and urged the government to ensure that the advantages of lower international crude oil prices are directly transferred to consumers. Kumari Selja said the Congress party would continue to raise issues concerning the welfare of farmers, workers, the middle class and the general public.
